The First Video System Manufacturer with Triple Certification!

Qualified fire protection certifications are required by various legislation, insurance and building regulations and also **help with settlements in the event of damage**. MOBOTIX is the first video systems manufacturer with triple certification for qualified fire protection. **Count on high-quality expertise!**

The **certified MOBOTIX systems** can monitor **20 areas** individually and sensitively in a single field of view. You can therefore effectively **avoid false alarms**.

VdS Approval for Integration in Fire Alarm Systems

VdS Schadenverhütung GmbH is Europe's largest institute for corporate security.

- Thermal camera with calibrated thermal sensor (no optical sensors)
- Triggers events when threshold values are exceeded (alarm, network message)
- Fixed system consisting of an M16 camera and interface boxes (overvoltage protection, power supply, connection to control center)

EN 54-10 Approval as a Point Flame Detector

The **European Committee for Standardization** sets out application guidelines for fire alarm systems in the EN 54 series of standards.

- Solution packages consisting of a flexible camera (M16, M73, S74) including accessories
- Conforms to the EU Construction Products Regulation
- Additional optical sensors can be used

CNPP Certification for Integration into Fire Alarm Systems

The **French National Centre for Prevention and Protection (CNPP)** is an organization for risk prevention certification.

- Solution package consisting of a flexible camera (M73, S74) and special app
- Additional optical sensors can be used
- Option to upgrade existing cameras
