ABOUT SCHLEIFENBAUER

Innovation Through Dedication

At Schleifenbauer Products BV, we specialise in developing reliable rack PDUs and advanced energy management software for data centres and industrial environments. Proudly manufactured in the Netherlands—at the heart of Europe's data centre hub—our products are designed and engineered in-house to ensure exceptional quality and precision.

Whether you manage a hyperscale facility or a smaller-scale data room, Schleifenbauer delivers solutions that scale with your needs. From high-volume rollouts to one-off configurations, we support projects of any size—with the same focus on speed, quality and flexibility.

We offer both standard and project-specific PDU configurations, including tailored cable lengths, outlet types, surge protection and management options—delivered at no additional cost and with short lead times to keep your project on track. Our agile production and dedicated support team ensure a smooth experience from design to delivery.

Our latest development, the PDU 5.0, sets a new benchmark for efficiency, reliability, and sustainability. Its innovative design reduces energy consumption and environmental impact while maintaining robust power distribution. The PDU 5.0 integrates seamlessly with monitoring systems, providing real-time data insights for effective power management.

At Schleifenbauer, sustainability is embedded in every decision we make. Our PDUs are energy-efficient, designed to last over 15 years, and feature a modular architecture that minimises waste and reduces failure risks. Each unit is built to order—preventing overproduction—and is shipped using recycled materials or delivered packaging-free directly to the data centre white space. In-house manufacturing and a sustainable regional supply chain further reduce our environmental footprint.

Choose Schleifenbauer for expert power distribution solutions since 2008—backed by proven quality and industry-leading support. Get in touch to find out how we can support your next project.

One-Stop PDU Shop

Schleifenbauer delivers any PDU configuration to your project's needs. No searching for the best fit, we build the PDU to your specifications in any quantity, at no extra cost. Just share your requirements!

EnerTree DCEM Software

PDU 5.0 includes free Data Centre Energy Management software, enabling full PDU intelligence for monitoring and management.

Seamless BMS/DCIM integration supports HTTP/HTTPS, REST API, MODBUS/TCP, SNMP (v1/v2c/v3), IPv4/IPv6, and more.

Built with strong security, including user roles, Active Directory®, LDAP/S, AES 256-bit encryption, SSH, and SSL/TLS 1.3.

Gateway: EnerTree Platform (server/desktop install)

Controller: EnerTree Lite (embedded)

3 Different Hot Swappable Controller Modules

Easily upgrade your PDU's monitoring capabilities with three module options:

Gateway: Advanced monitoring, management, analytics, software-driven and centralised PDU intelligence via EnerTree DCEM software platform.

Controller: Conventional monitoring with EnerTree Lite. WEB GUI for independent management and direct integration with any DCIM software.

Daisy Chain: Secure data relay to a Gateway or Controller, enabling a cost-effective, hardware-secured PDU network ring in a daisy chain setup.

PDU Outlet Control

Quickly resolve issues or extend critical device runtime during power failures with outlet-level control. The PDU features N-ZVS and bi-stable relays for reliable switching and energy efficiency during power events.

Versatile & Secure Power Outlets

Our CX combination outlet C13/C15/C19/C21 allows flexible connections for C14, C16, C20, and C22 plugs in a single socket. Prevent accidental disconnections with IEC Lock from Scolmore. Explore our other high-density outlets, fully compatible with V-lock cables. Custom outlet combinations, load balancing, and layouts are available on request to fit your needs.

Surge protection Type 3 by Dehn

Choose a Dehn surge protector in your rack PDU for protection against voltage spikes and optimal operational continuity. Type 3 provides direct protection for IT hardware, in addition to Type 1 and 2. It complies with EN 50600-2-2 and NEN-EN-IEC 62305 and follows the "10-meter rule" for maximum safety. Prevent downtime with smart protection and preventive maintenance.

Residual Current Sensor (RCS)

Select an RCS in your PDU to enhance electrical safety by detecting leakage currents, reducing the risk of electrical faults, and protecting connected equipment from potential damage.

External Earthing

The PDU's earthing complies with CE standards. An optional external earthing provision is available on request for installations with specific grounding requirements to reduce potential differences.

Environmental Monitoring

Supports 32 sensors per PDU. Proactively monitor environmental conditions within your cabinet to ensure optimal performance. A range of sensors are available to suit your needs, including temperature, humidity and digital input for airflow, door position, flood detection sensors and more.

LED Status Ring and Remote Display via NFC

No fixed display required—use the display app on your smart device, such as a tablet or smartphone, to create a fully functional PDU display. Simply connect to the PDU via NFC for easy, on-the-go PDU insight and monitoring time stamp.

Your logo

Our PDU concept allows for customization with your logo. If desired, we can add your logo to the PDU, or you can opt for an OEM partnership for further branding opportunities.

High scalability

Daisy-chain up to 100 devices on a single IP address and access real-time PDU data stream without polling delays. With zero-touch provisioning to streamline deployment through self-configuration of downstream devices, reducing setup time.

Remote Connectivity

Dual 1 Gbps Ethernet (Ethernet & USB) enables fast data transfer, allowing remote access to the rack PDU via network or serial connection. Monitor power consumption and set custom alerts to prevent downtime.

Redundant Databus

Simplifies intelligent rack PDU connectivity and ensures continuous data reporting, even if there is a disruption in the network chain.

Low Profile Breakers

Compact hydraulic magnetic circuit breakers designed to maintain a streamlined PDU layout. Choose from a variety of circuit breakers, including thermal fuses, MCBs, and glass fuses. We offer free customization of your PDU with your preferred breakers, regardless of order quantity.

Power Monitoring with 0.5% Accuracy

Enables data center managers to monitor input and outlet-level power usage with 0.5% accuracy for precise and reliable energy tracking.

High Temperature Grade

Designed for environments with working temperatures exceeding 60°C, offering reliable performance in high-temperature conditions.

Input Options

We place the power input exactly where you need it (top/bottom), aligning it with the power source in your data centre. Available in 1-phase and 3-phase configurations with options for 10A, 16A, 32A, and 63A to simplify IT power infrastructure. You have also flexibility in cable length and plug type.

Minimal Ecological Footprint

Proudly designed and manufactured in the Netherlands, our products are built to order with fast delivery and free customization options, ensuring minimal environmental impact while meeting your specific needs.

PDU 5.0 & EnerTree: A Scalable Monitoring Concept for Data Centres

Each Schleifenbauer PDU 5.0 collects detailed energy and outlet-level data via a communication module—either a **Gateway Module** or a **Controller Module**. In setups using a **Gateway Module**, all data is transmitted to the **EnerTree platform** software, which runs on a local server or desktop. This approach shifts data processing away from the PDU, enabling centralised monitoring across multiple devices with minimal load on the rack hardware. Alternatively, if the use of external software is not preferred, the **Controller Module** offers an ideal solution. It includes embedded **EnerTree Lite** software, enabling onboard intelligence and visualisation directly via the PDU's web interface. This makes it suitable for standalone installations or environments requiring self-contained monitoring without reliance on external systems.

Centralising PDU Intelligence

Traditional intelligent PDUs rely on embedded processors within each unit, increasing hardware complexity, cost, and dependency. Schleifenbauer takes a different approach with **PDU 5.0** and the **EnerTree platform**: by relocating intelligence to a central server or desktop via a **Gateway Module**, the PDU itself is optimised purely for **precise and reliable power measurement**. This architecture not only simplifies the hardware at rack level—it also unlocks the benefits of **high-performance, server-based software**. **EnerTree** enables advanced analysis, faster data handling, and seamless monitoring of large PDU deployments, helping data centres extract maximum value and control from their power infrastructure.

Efficient and Scalable Energy Management

EnerTree comes cost free with PDU 5.0 and is a full data centre energy management (DCEM) software. It is designed to manage large numbers of devices and supports up to **10,000 PDUs** within a network.

The software automatically generates an overview of all connected PDUs, allowing easy mapping of the physical data centre environment. It can be further specified at the **rack level**.

The software is intuitive and user-friendly, with dashboards automatically generated based on the implemented infrastructure, eliminating the need for user manuals.

Cascading

Combine a single PDU with **Gateway or Controller Module** with multiple PDUs equipped with **Daisy Chain Modules**, you create a **scalable and cost-effective ring configuration**. This setup ensures fast data transmission and efficient, secure energy management.

Communication Modules

Choose the communication setup that fits your data centre. Each module can be switched or upgraded at any time—transforming the functionality of the PDU without needing to replace it. All modules stream real-time data for live monitoring of power usage and environmental factors. The integrated LED ring instantly shows system status and alerts, helping administrators respond quickly and effectively.

The module is ESD safe and Toolless Hot-swappable. No fixed display required. Monitor PDU data directly in the rack via a secure NFC connection using the Rack PDU Display app on your smartphone or tablet.

When to Choose a Gateway Module

Connects securely to the network and works with the **EnerTree platform** for advanced, centralised monitoring via server or desktop. **Best for:** Data centres that want to centralise intelligence for maximum processing power and reporting flexibility.

When to Choose a Controller Module

Includes embedded **EnerTree Lite** software and connects directly via LAN, offering onboard intelligence and real-time data access without external systems. **Best for:** Data centres preferring device-level control in a more traditional, decentralised setup.

When to Choose a Daisy Chain Module

Acts as a data relay in a ring network. No Ethernet port for improving security while reducing installation cost and complexity. **Best for:** Connecting up to 99 PDUs with Daisy Chain module to a single PDU with Gateway or Controller PDU for efficient, fast and hardware secured scalable monitoring.

Category	EnerTree feature	Platform	Lite
Communication	Module type	Gateway	Controller
Performance	Maximum number of PDUs in system	10,000	100
	Maximum number of rings supported	100	1
	Maximum number of PDUs in 1 ring (single IP address)	100	100
	Measurements refresh rate	once/s	once/5s
Device management	Auto discovery of new added PDUs in system	✓	✓
	Mass configuration	✓	✓
	Grouping of devices and aggregation of measurements	✓	
	Supports Schleifenbauer generation 2 and 3 devices	✓	
User management	Customizable roles and permissions, group management, etc.	✓	✓
Control & alerts	Group switching	✓	
	Configurable thresholds for all measurements (warnings/alerts)	✓	
Data	Dashboarding	advanced	basic
	Creation of reports	advanced	basic
	Scheduling of reports	✓	
	Export of data to files or databases	✓	✓
Security	Logging and auditing	advanced	basic
	Updating & Back-up (configuration, log files)	✓	✓

High-performance software

Developed to monitor and manage PDUs in data centres. With its powerful capabilities, **EnerTree** provides real-time insights and complete control over your rack power distribution infrastructure.

Integration

EnerTree Platform and **EnerTree Lite** seamlessly integrate with virtually any DCIM or power management system, ensuring full compatibility with modern data centre environments.

Supported Protocols & Interfaces:

- HTTP/HTTPS
- REST API
- MODBUS/TCP
- SNMP (v1, v2c, v3)
- SNMP Traps
- IPv4/IPv6
- SMTP
- Syslog
- Command Line Interface

Data Export Capabilities:

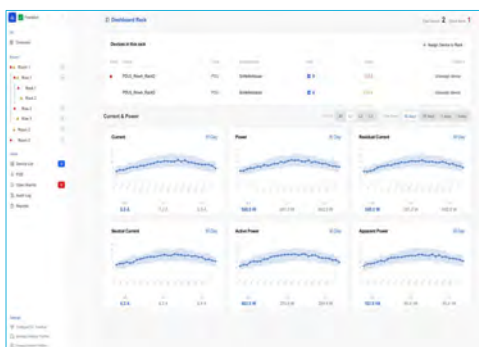

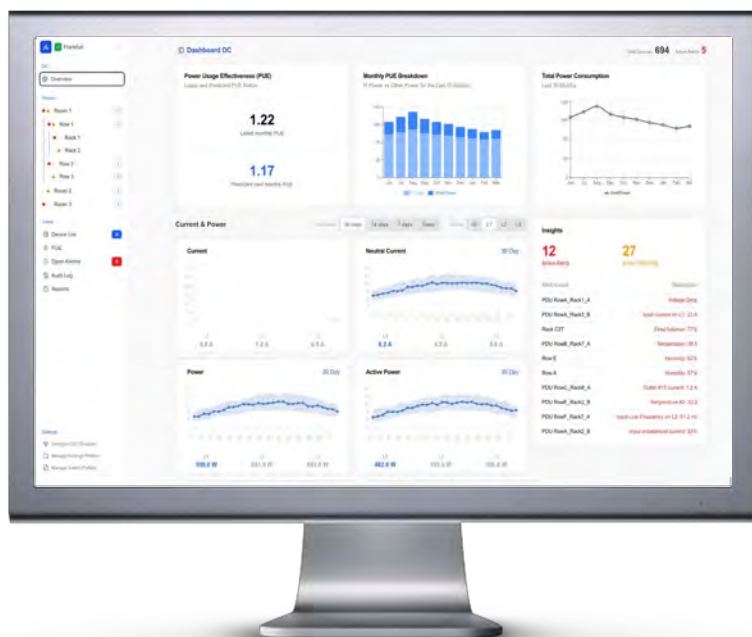

- MS SQL
- MySQL
- MariaDB

This broad integration ensures:

- ✓ Reliable real-time communication
- ✓ Streamlined monitoring
- ✓ Efficient power management

User Experience

Thanks to its intuitive interface and optimised UX, the system can be fully deployed independently, without the need for external support. This makes **EnerTree** a future-proof solution for efficient and intelligent energy management in data centres.

Rack dashboard

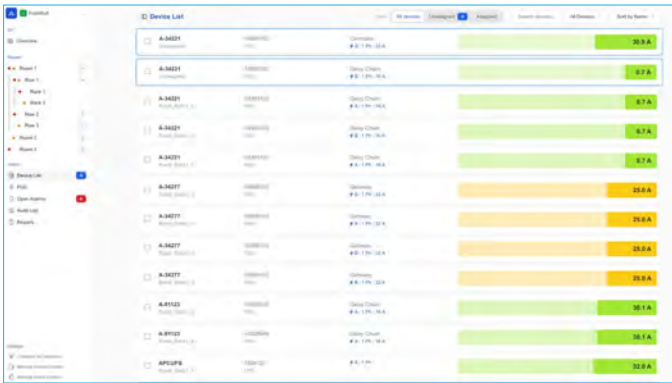

Audit log

Advanced Functionalities

EnerTree provides extensive energy management features, including:

- **Comprehensive energy monitoring:** Real-time tracking of energy consumption, voltage, temperature, power quality, and harmonics.
- **Advanced alerts and notifications:** Automated alerts for threshold breaches, redundant failover detection, and tailored email notifications.
- **Intuitive rule creator:** Effortless threshold configuration with customisable rules.
- **Incident manager:** Identifies faults and supports predictive maintenance for proactive issue resolution.
- **Environmental monitoring:** Sensors for temperature, humidity, and other critical parameters.
- **Hierarchical view:** Clear representation of infrastructure for real-time visualisation and efficient monitoring.
- **Data analysis and reporting:** Historical data assessment, automated custom reports, and calculation.
- **Filtering options:** Display only relevant warnings and incidents to streamline management.
- **Automated backups and updates:** Ensures system continuity and keeps firmware up to date.
- **PUE calculation:** Advanced Power Usage Effectiveness (PUE) metrics for optimising energy efficiency.
- **Backwards compatible:** Previous generations of Schleifenbauer PDUs are fully supported by EnerTree.

Intelligent energy management tailored to modern data centres.

Capacity management

PUE calculation

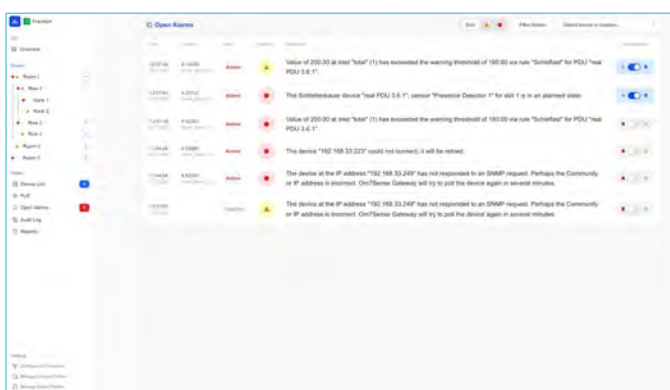

EnerTree Overview

- Scalable for all data centre sizes
- Centralised management
- Secure data storage and protection
- Real-time analysis and visualisation
- Automatic PDU detection
- Customisable alerts and reports
- Automated firmware update reports
- Mass updates for efficient PDU management
- Full sensor support
- Secure PDU swaps
- Real-time daisy chain communication
- Automated backups and updates
- Fastest measurement refresh rate

Management & Security

EnerTree offers advanced monitoring and security features for seamless data centre management.

- **Real-time Alerts & Reporting** – An open alarm list with status updates ensures immediate issue detection. Automated reports provide detailed insights into energy consumption.
- **User Management** – Assign PDUs to specific users with granular access control.
- **Data Integration & Export** – MySQL database integration supports in-depth analysis, while an embedded SNMP agent enables seamless energy data export to external software.
- **Robust Security** – Features include configurable strong passwords, user roles and permissions, Active Directory® and LDAP/S integration, 256-bit AES encryption, secure boot, SSH, SSL/TLS 1.3, and HTTPS.

Open alarm administration

EnerTree offers:

- **Comprehensive audit logs** to track all actions performed on PDUs
- **LDAP integration** for seamless user management within existing Active Directory environments
- **Detection of unused equipment** for fast adoption in the system
- **Automated backups** for enhanced security

System Requirements

EnerTree is compatible with modern data centre environments and can be deployed across various IT infrastructures:

- **Virtual systems:** VMware ESX(i) 4.1 or higher / Docker 18.03 or higher / Modern Linux OS
- **Memory:** Minimum 3 GB RAM
- **Storage:** Minimum 80 GB (OVF)

Metered Inlet PDUs with Flexible Communication Options

Schleifenbauer Metered PDUs with metered inlets provide accurate, real-time monitoring of power consumption at the inlet level. Measurement data is accessible both locally and over the network, making these PDUs a vital component in efficient, reliable and compliant data centre power infrastructure.

Key Benefits of Metered Inlet PDUs

- **Accurate power monitoring:** Enables precise insight into power consumption per device or device group, supporting capacity planning, cost allocation and infrastructure optimisation. Billing-grade accuracy ($\pm 0.5\%$)
- **Overload prevention:** Real-time load tracking reduces the risk of downtime caused by overloaded circuits or tripped breakers.
- **Energy efficiency:** Identifies energy-intensive equipment, helping to reduce overall power usage and environmental impact.
- **Regulatory compliance:** Supports reporting for industry standards, with consistent and accurate measurement data.

Flexible Module Options to Match Your Infrastructure

This catalogue lists all PDU configurations with a **Gateway Module** as standard. However, the same PDUs are also available with a **Controller Module** or a **Daisy Chain Module**, depending on your infrastructure and monitoring preferences. Please specify your preferred module when requesting a quote.

Model

METERED PDU

GM 99CBHIN1101

METERED PDU 5.0 GATEWAY

1. Summary:

- horizontal PDU
- single phase 16 A
- metered input
- 12 outlets

SPECIFICATIONS

GENERAL	Remote display using smartphone NFC app, up to 100 PDUs share one IP address, ESD safe, toolless hot swappable communications module	
CONNECTIVITY	Gateway Module: dual 1Gbps Ethernet (RJ45/USB), RJ45 daisy chain, USB expansion/sensor • TLS encrypted communication to complimentary Enertree PDU monitoring & management software	
ENCLOSURE	Profile color black, aluminium with stainless steel covers (IP20)	
DIMENSIONS	L x W x D = 440 x 65 x 52.5 mm (1.5 U) (excl. strain relief, mounting & cable bending radius)	
MOUNT	sidecover 19 inch	
POWER INPUT	single phase 16 A, 230VAC - 50Hz	
CABLE ENTRY	power entry rear-side left	
CABLE & PLUG	Power lead (3G2,5 halogenfree) with CEE plug 3,0m (strain relief height 2,5cm)	
INPUT METERING	voltage (V), current (A), active power (W), apparent power (VA), reactive power (VAR), energy (kWh), apparent energy (VAh), frequency (Hz), power factor, crest factor, total harmonic distortion (%)	
OUTLETS	12 x IEC 60320 C13	
FUSES	n/a	
CONFIGURABLE	Each PDU can be configured to your exact specifications—at no additional cost—including outlet configuration, fuse type, cable inlet position, cable length, plug type, protective features, RCS integration, and housing colour	

1 Phase 16 ampere 3.6 kVA

Tender text bid submittal: GM 99CBHIN1101 Metered 1-phase 16A horizontal PDU (3.6 kVA) with 12 x IEC C13 outlets. Input metering. Gateway Module with dual Gigabit LAN, USB, NFC remote display, and LED ring. Protocols: HTTP/HTTPS, REST API, MODBUS/TCP, SNMP v1/v2c/v3, Traps, IPv4/6, SMTP, Syslog, CLI. Data export: MS SQL, MySQL, MariaDB. Aluminium housing (IP20), 3.0m CEE 16A plug. 60°C rated. Cascading 100 PDUs per IP. Cascading 32 Sensors per PDU. Complimentary EnerTree DCEM software.

- vertical PDU (0 U)
- single phase 32 A
- metered inputs
- metered branches (2x)
- 42 outlets

SPECIFICATIONS

GENERAL	Remote display using smartphone NFC app, up to 100 PDUs share one IP address, ESD safe, toolless hot swappable communications module	
CONNECTIVITY	Gateway Module: dual 1Gbps Ethernet (RJ45/USB), RJ45 daisy chain, USB expansion/sensor • TLS encrypted communication to complimentary Enertree PDU monitoring & management software	
ENCLOSURE	Profile color black, aluminium with stainless steel covers (IP20)	
DIMENSIONS	L x W x D = 1125 x 65 x 52.5 mm (0U) (excl. strain relief, mounting & cable bending radius)	
MOUNT	Toolless mount buttons (brackets not included) (distance=800, positions=162.4, 962.6mm)	
POWER INPUT	single phase 32 A, 230VAC - 50Hz	
CABLE ENTRY	power entry side-cover top	
CABLE & PLUG	Power lead (3G6 halogenfree) with CEE plug 3,0m (strain relief height 2,5cm)	
BRANCH METERING	2 times voltage (V), current (A), active power (W), apparent power (VA), reactive power (VAR), energy (kWh), apparent energy (VAh), frequency (Hz), power factor, crest factor, total harmonic distortion (%)	
OUTLETS	36 x IEC 60320 C13 , 6 x IEC 60320 C19	
FUSES	2 x Hydraulic-magnetic breaker 16A	
CONFIGURABLE	Each PDU can be configured to your exact specifications—at no additional cost—including outlet configuration, fuse type, cable inlet position, cable length, plug type, protective features, RCS integration, and housing colour	

1 Phase 32 ampere 7.4 kVA

Tender text bid submittal: GM 00F1VMN1323 Metered 1-phase 32A vertical PDU (22 kVA) with 36 x IEC 60320 C13 and 6 x IEC 60320 C19 outlets. Input and branch (2x) metering. Gateway Module with dual Gigabit LAN, USB, NFC remote display, and LED ring. Protocols: HTTP/HTTPS, REST API, MODBUS/TCP, SNMP v1/v2c/v3, Traps, IPv4/6, SMTP, Syslog, CLI. Data export: MS SQL, MySQL, MariaDB. Aluminium housing (IP20), 3.0m halogen-free CEE 32A power lead. 2x hydraulic-magnetic breakers. 60°C rated. Cascading 100 PDUs per IP. Cascading 32 Sensors per PDU. Complimentary EnerTree DCEM software.

Features	Metering per phase	Branch Metering	Outlet Metering	Outlet Switching

GM D414HIN3101

METERED PDU 5.0 GATEWAY

SPECIFICATIONS

GENERAL

Remote display using smartphone NFC app, up to 100 PDUs share one IP address, ESD safe, toolless hot swappable communications module

CONNECTIVITY

Gateway Module: dual 1Gbps Ethernet (RJ45/USB), RJ45 daisy chain, USB expansion/sensor • TLS encrypted communication to complimentary Enertree PDU monitoring & management software

ENCLOSURE

Profile color black, aluminium with stainless steel covers (IP20)

DIMENSIONS

L x W x D = 440 x 65 x 52.5 mm (1.5 U)
(excl. strain relief, mounting & cable bending radius)

MOUNT

sidecover 19 inch

POWER INPUT

three phase 16 A, 230/400V - 50Hz

CABLE ENTRY

power entry rear-side left

CABLE & PLUG

Power lead (5G2,5 halogenfree) with CEE plug 3,0m (strain relief height 2,5cm)

INPUT METERING

voltage (V), current (A), active power (W), apparent power (VA), reactive power (VAR), energy (kWh), apparent energy (VAh), frequency (Hz), power factor, crest factor, total harmonic distortion (%)

OUTLETS

3 x IEC Lock 60320 - CX (C13/C15/C19/C21) and 3 x IEC Lock C13/C15

FUSES

n/a

CONFIGURABLE

Each PDU can be configured to your exact specifications—at no additional cost—including outlet configuration, fuse type, cable inlet position, cable length, plug type, protective features, RCS integration, and housing colour

3 Phase 16 ampere 11 kVA

Tender text bld submittal: GM D414HIN3101 Metered 3-phase 16A horizontal PDU (11 kVA) with 3 x IEC Lock CX (C13/C15/C19/C21) and 3 x IEC Lock C13/C15 outlets. Input metering with Gateway Module featuring dual Gigabit LAN, USB, NFC remote display, and LED ring. Protocols: HTTP/HTTPS, REST API, MODBUS/TCP, SNMP v1/v2c/v3, Traps, IPv4/6, SMTP, Syslog, CLI. Data export: MS SQL, MySQL, MariaDB. Aluminium housing (IP20), 3.0m halogen-free CEE 16A power lead, 60°C rated. Cascading 100 PDUs per IP. Cascading 32 Sensors per PDU. Complimentary EnerTree DCEM software.

Metered Outlet PDUs with Flexible Communication Options

Schleifenbauer's Monitored PDUs combine all the advantages of inlet-level monitoring with precise, per-outlet power measurement. This enables detailed, device-level visibility—accessible both locally and over the network—for comprehensive power management in critical data centre environments.

Key Benefits of Outlet-Level Power Monitoring

- **Precise power monitoring:** Real-time insights at the outlet level support capacity planning, load balancing, and early detection of potential issues such as overloads or underutilisation.
- **Billing and cost allocation:** Enables accurate power usage tracking for individual departments, colocation clients or business units, supporting internal billing based on actual consumption. Billing-grade accuracy (+/- 0.5%)
- **Equipment protection and reliability:** Identifies devices drawing excessive power, helping prevent overheating, reduce electrical strain, and extend equipment lifespan.
- **Regulatory compliance:** Provides accurate, auditable data for compliance with industry regulations, including sectors with strict energy reporting requirements such as finance or healthcare.

Flexible Module Options to Match Your Infrastructure

This catalogue lists all PDU configurations with a **Gateway Module** as standard. However, each configuration is also available with a **Controller Module** or a **Daisy Chain Module**, depending on your infrastructure and monitoring preferences. Please specify your preferred module when requesting a quote.

Model MONITORED PDU

GM BBC2HIM1101

MONITORED PDU 5.0 GATEWAY

SPECIFICATIONS

GENERAL	Remote display using smartphone NFC app, up to 100 PDUs share one IP address, ESD safe, toolless hot swappable communications module	
CONNECTIVITY	Gateway Module: dual 1Gbps Ethernet (RJ45/USB), RJ45 daisy chain, USB expansion/sensor • TLS encrypted communication to complimentary Enertree PDU monitoring & management software	
ENCLOSURE	Profile color black, aluminium with stainless steel covers (IP20)	
DIMENSIONS	L x W x D = 440 x 65 x 52.5 mm (1.5 U) (excl. strain relief, mounting & cable bending radius)	
MOUNT	sidecover 19 inch	
POWER INPUT	single phase 16 A, 230VAC - 50Hz	
CABLE ENTRY	power entry rear-side left	
CABLE & PLUG	Power lead (3G2,5 halogenfree) with CEE plug 3,0m (strain relief height 2,5cm)	
INPUT METERING	voltage (V), current (A), active power (W), apparent power (VA), reactive power (VAR), energy (kWh), apparent energy (VAh), frequency (Hz), power factor, crest factor, total harmonic distortion (%)	
OUTLETS	8 x IEC 60320 C13	
METERED OUTLETS	8 times voltage (V), current (A), active power (W), apparent power (VA), reactive power (VAR), energy (kWh), apparent energy (VAh), power factor, crest factor, total harmonic distortion (%)	
FUSES	n/a	
CONFIGURABLE	Each PDU can be configured to your exact specifications—at no additional cost—including outlet configuration, fuse type, cable inlet position, cable length, plug type, protective features, RCS integration, and housing colour

DIMENSIONS	L x W x D = 440 x 65 x 105 mm (1.5 U) (excl. strain relief, mounting & cable bending radius)	
MOUNT	sidecover 19 inch double deep housing	
POWER INPUT	single phase 16 A, 230VAC - 50Hz	
CABLE ENTRY	power entry rear-side left	
CABLE & PLUG	Power lead (3G2,5 halogenfree) with CEE plug 3,0m (strain relief height 2,5cm)	
INPUT METERING	voltage (V), current (A), active power (W), apparent power (VA), reactive power (VAR), energy (kWh), apparent energy (VAh), frequency (Hz), power factor, crest factor, total harmonic distortion (%)	
OUTLETS	7 x IEC Lock 60320 – CX (C13/C15/C19/C21) and 7 x IEC Lock C13/C15	
METERED OUTLETS	14 times voltage (V), current (A), active power (W), apparent power (VA), reactive power (VAR), energy (kWh), apparent energy (VAh), power factor, crest factor, total harmonic distortion (%)	
FUSES	n/a	
CONFIGURABLE	Each PDU can be configured to your exact specifications—at no additional cost—including outlet configuration, fuse type, cable inlet position, cable length, plug type, protective features, RCS integration, and housing colour	

1 Phase 16 ampere 3.6 kVA

18. Summary:

- double horizontal PDU
- single phase 16 A
- metered input
- metered outlets
- 14 outlets

Tender text bld submittal: GM 0B7FDIM1101 Metered 1-phase 16A horizontal PDU (3.6 kVA) with 7 x IEC Lock CX (C13/C15/C19/C21) and 7 x IEC Lock C13/C15 outlets. Input and outlet-level metering (14x). Gateway Module with dual Gigabit LAN, USB, NFC remote display, and LED ring. Protocols: HTTP/HTTPS, REST API, MODBUS/TCP, SNMP v1/v2c/v3, Traps, IPv4/6, SMTP, Syslog, CLI. Data export: MS SQL, MySQL, MariaDB. Aluminium housing (IP20), 3.0m halogen-free CEE 16A power lead, 60°C rated. Cascading 100 PDUs per IP. Cascading 32 Sensors per PDU. Complimentary EnerTree DCEM software.

Features	Metering per phase	Branch Metering	Outlet Metering	Outlet Switching
Intelligence	✓		✓	

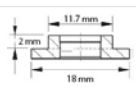

GM C899VIM1101

MONITORED PDU 5.0 GATEWAY

19. Summary:

- vertical PDU (0 U)
- single phase 16 A
- metered input
- metered outlets
- 30 outlets

SPECIFICATIONS

GENERAL	Remote display using smartphone NFC app, up to 100 PDUs share one IP address, ESD safe, toolless hot swappable communications module	
CONNECTIVITY	Gateway Module: dual 1Gbps Ethernet (RJ45/USB), RJ45 daisy chain, USB expansion/sensor • TLS encrypted communication to complimentary Enertree PDU monitoring & management software	
ENCLOSURE	Profile color black, aluminium with stainless steel covers (IP20)	
DIMENSIONS	L x W x D = 1230 x 65 x 52.5 mm (0U) (excl. strain relief, mounting & cable bending radius)	
MOUNT	Toolless mount buttons (brackets not included) (distance=800, positions=215.0, 1015.0mm)	
POWER INPUT	single phase 16 A, 230VAC - 50Hz	
CABLE ENTRY	power entry side-cover top	
CABLE & PLUG	Power lead (3G2,5 halogenfree) with CEE plug 3,0m (strain relief height 2,5cm)	
INPUT METERING	voltage (V), current (A), active power (W), apparent power (VA), reactive power (VAR), energy (kWh), apparent energy (VAh), frequency (Hz), power factor, crest factor, total harmonic distortion (%)	
OUTLETS	24 x IEC 60320 C13 , 6 x IEC 60320 C19	
METERED OUTLETS	30 times voltage (V), current (A), active power (W), apparent power (VA), reactive power (VAR), energy (kWh), apparent energy (VAh), power factor, crest factor, total harmonic distortion (%)	
FUSES	n/a	
CONFIGURABLE	Each PDU can be configured to your exact specifications—at no additional cost—including outlet configuration, fuse type, cable inlet position, cable length, plug type, protective features, RCS integration, and housing colour	

1 Phase 16 ampere 3.6 kVA

Tender text bld submittal: GM C899VIM1101 Metered 1-phase 16A vertical PDU (3.6 kVA) with 24 x IEC C13 and 6 x IEC C19 outlets. Input and outlet-level metering (30x). Gateway Module with dual Gigabit LAN, USB, NFC remote display, and LED ring. Protocols: HTTP/HTTPS, REST API, MODBUS/TCP, SNMP v1/v2c/v3, Traps, IPv4/6, SMTP, Syslog, CLI. Data export: MS SQL, MySQL, MariaDB. Aluminium housing (IP20), 3.0m halogen-free CEE 16A power lead. 60°C rated. Cascading 100 PDUs per IP. Cascading 32 Sensors per PDU. Complimentary EnerTree DCEM software.

GM 649EDMM1323

MONITORED PDU 5.0 GATEWAY

SPECIFICATIONS

GENERAL

Remote display using smartphone NFC app, up to 100 PDUs share one IP address, ESD safe, toolless hot swappable communications module

CONNECTIVITY

Gateway Module: dual 1Gbps Ethernet (RJ45/USB), RJ45 daisy chain, USB expansion/sensor • TLS encrypted communication to complimentary Enertree PDU monitoring & management software

ENCLOSURE

Profile color black, aluminium with stainless steel covers (IP20)

DIMENSIONS

L x W x D = 440 x 65 x 105 mm (1.5 U)
(excl. strain relief, mounting & cable bending radius)

MOUNT

sidecover 19 inch double deep housing

POWER INPUT

single phase 32 A, 230VAC - 50Hz

CABLE ENTRY

power entry rear-side left

CABLE & PLUG

Power lead (3G6 halogenfree) with CEE plug 3,0m (strain relief height 2,5cm)

BRANCH METERING

2 times voltage (V), current (A), active power (W), apparent power (VA), reactive power (VAR), energy (kWh), apparent energy (VAh), frequency (Hz), power factor, crest factor, total harmonic distortion (%)

OUTLETS

6 x IEC Lock 60320 – CX (C13/C15/C19/C21) and 6 x IEC Lock C13/C15

METERED OUTLETS

12 times voltage (V), current (A), active power (W), apparent power (VA), reactive power (VAR), energy (kWh), apparent energy (VAh), power factor, crest factor, total harmonic distortion (%)

FUSES

2 x Hydraulic-magnetic breaker 16A

CONFIGURABLE

Each PDU can be configured to your exact specifications—at no additional cost—including outlet configuration, fuse type, cable inlet position, cable length, plug type, protective features, RCS integration, and housing colour

1 Phase 32 ampere 7.4 kVA

22. Summary:

- double horizontal PDU
- single phase 32 A
- metered inputs
- metered branches (2x)
- metered outlets
- 12 outlets

Tender text bld submittal: GM 649EDMM1323 Metered 1-phase 32A horizontal PDU (7.4 kVA) with 6 x IEC Lock CX (C13/C15/C19/C21) and 6 x IEC Lock C13/C15 outlets. Input, branch (2x) and outlet-level metering (12x). Gateway Module with dual Gigabit LAN, USB, NFC remote display, and LED ring. Protocols: HTTP/HTTPS, REST API, MODBUS/TCP, SNMP v1/v2c/v3, Traps, IPv4/6, SMTP, Syslog, CLI. Data export: MS SQL, MySQL, MariaDB. Aluminium housing (IP20), 3.0m halogen-free CEE 32A power lead. 2x hydraulic-magnetic breakers. 60°C rated. Cascading 100 PDUs per IP. Cascading 32 Sensors per PDU. CABLE & PLUG	Power lead (5G6 halogenfree) with CEE plug 3,0m (strain relief height 2,5cm)	
INPUT METERING	voltage (V), current (A), active power (W), apparent power (VA), reactive power (VAR), energy (kWh), apparent energy (VAh), frequency (Hz), power factor, crest factor, total harmonic distortion (%)	
OUTLETS	36 x IEC 60320 - C13/C15/C19/C21 and C13/C15 (IEC Lock)	
METERED OUTLETS	36 times voltage (V), current (A), active power (W), apparent power (VA), reactive power (VAR), energy (kWh), apparent energy (VAh), power factor, crest factor, total harmonic distortion (%)	
FUSES	6 x Hydraulic-magnetic breaker 16A	
CONFIGURABLE	Each PDU can be configured to your exact specifications—at no additional cost—including outlet configuration, fuse type, cable inlet position, cable length, plug type, protective features, RCS integration, and housing colour	

3 Phase 32 ampere 22 kVA

Tender text bld submittal: GM A935VIM3361 Metered 3-phase 32A vertical PDU (22 kVA) with 36 x IEC Lock outlets (C13/C15/C19/C21). Input and outlet-level metering (36x). Gateway Module with dual Gigabit LAN, USB, NFC remote display, and LED ring. Protocols: HTTP/HTTPS, REST API, MODBUS/TCP, SNMP v1/v2c/v3, Traps, IPv4/6, SMTP, Syslog, CLI. Data export: MS SQL, MySQL, MariaDB. Aluminium housing (IP20), 3.0m halogen-free CEE 32A power lead, 6x hydraulic-magnetic breakers, 60°C rated. Cascading 100 PDUs per IP. Cascading 32 Sensors per PDU. Complimentary EnerTree DCEM software.

Features	Metering per phase	Branch Metering	Outlet Metering	Outlet Switching
Intelligence	✓		✓	

GM 32EEWMM36C8

MONITORED PDU 5.0 GATEWAY

29. Summary:

- double vertical PDU
- three phase 63 A
- metered inputs
- metered branches (12x)
- metered outlets
- 30 outlets

SPECIFICATIONS

GENERAL	Remote display using smartphone NFC app, up to 100 PDUs share one IP address, ESD safe, toolless hot swappable communications module	
CONNECTIVITY	Gateway Module: dual 1Gbps Ethernet (RJ45/USB), RJ45 daisy chain, USB expansion/sensor • TLS encrypted communication to complimentary Enertree PDU monitoring & management software	
ENCLOSURE	Profile color black, aluminium with stainless steel covers (IP20)	
DIMENSIONS	L x W x D = 1755 x 65 x 105 mm (0U) (excl. strain relief, mounting & cable bending radius)	
POWER INPUT	three phase 63 A, 230/400V - 50Hz	
CABLE ENTRY	power entry side-cover top	
CABLE & PLUG	Power lead (5G10 halogenfree) with CEE plug 3,0m	
BRANCH METERING	12 times voltage (V), current (A), active power (W), apparent power (VA), reactive power (VAR), energy (kWh), apparent energy (VAh), frequency (Hz), power factor, crest factor, total harmonic distortion (%)	
OUTLETS	30 x IEC 60320 - C13/C15/C19/C21 (IEC Lock)	
METERED OUTLETS	30 times voltage (V), current (A), active power (W), apparent power (VA), reactive power (VAR), energy (kWh), apparent energy (VAh), power factor, crest factor, total harmonic distortion (%)	
FUSES	12 x Hydraulic-magnetic breaker 16A	
CONFIGURABLE	Each PDU can be configured to your exact specifications—at no additional cost—including outlet configuration, fuse type, cable inlet position, cable length, plug type, protective features, RCS integration, and housing colour	

3 Phase 63 ampere 43.6 kVA

Tender text bid submittal: GM 32EEWMM36C8 Metered 3-phase 63A vertical PDU (43.6 kVA) with 30 x IEC Lock outlets (C13/C15/C19/C21). Input, branch (12x) and outlet metering. Gateway Module with dual Gigabit LAN, USB, NFC remote display, and LED ring. Protocols: HTTP/HTTPS, REST API, MODBUS/TCP, SNMP v1/v2c/v3, Traps, IPv4/6, SMTP, Syslog, CLI. Data export: MS SQL, MySQL, MariaDB. Aluminium housing (IP20), 3.0m halogen-free CEE 63A power lead, 12x hydraulic-magnetic breakers, 60°C rated. Cascading 100 PDUs per IP. Cascading 32 Sensors per PDU. Complimentary EnerTree DCEM software.

Features	Metering per phase	Branch Metering	Outlet Metering	Outlet Switching

OUTLET SWITCHABLE

Outlet switchable PDUs with Flexible Communication Options

Schleifenbauer's switched PDUs offer all the capabilities of metered inlet models, with the added benefit of **remote outlet control**. Authorised users can securely power-cycle individual outlets, reboot connected devices, and implement power sequencing to minimise inrush current—improving energy efficiency, infrastructure control, and service continuity.

Key Benefits of Remote Power Switching

- **Energy efficiency:** Reduce unnecessary power consumption by disabling idle equipment, lowering operational costs and improving sustainability.
- **Operational flexibility:** Remotely manage power distribution without physical access to the rack—ideal for large-scale or restricted environments.
- **Optimised energy usage:** Gain granular insight into outlet-level consumption to identify inefficiencies and reduce unnecessary energy usage. Billing-grade accuracy (+/- 0.5%).
- **Enhanced security and safety:** Prevent unauthorised device connections and quickly shut down critical equipment in emergencies or failure scenarios.
- **Automation and integration:** Support for scheduled switching, load balancing and integration with automation platforms enhances resilience and control.
- **Bi-stable relays:** Minimise energy consumption by using relays that require power only during switching, not to maintain the current state—resulting in lower internal heat and increased efficiency.
- **Near Zero Voltage Switching (N-ZVS):** Switching occurs at the lowest point of the AC waveform, reducing electrical stress and prolonging the lifespan of connected devices.
- **Outlet switching delay:** Configurable delay per outlet or group prevents inrush current, evenly distributes the load and ensures stable power-up behaviour.

Flexible Module Options to Match Your Infrastructure

This catalogue lists all PDU configurations with a **Gateway Module** as standard. However, each configuration is also available with a **Controller Module** or a **Daisy Chain Module**, depending on your infrastructure and monitoring needs. Please specify your preferred module when requesting a quote.

Model

SWITCHED PDU

GM 1FE2DIS1101

SWITCHED PDU 5.0 GATEWAY

SPECIFICATIONS

GENERAL	Remote display using smartphone NFC app, up to 100 PDUs share one IP address, ESD safe, toolless hot swappable communications module	
CONNECTIVITY	Gateway Module: dual 1Gbps Ethernet (RJ45/USB), RJ45 daisy chain, USB expansion/sensor • TLS encrypted communication to complimentary Enertree PDU monitoring & management software	
ENCLOSURE	Profile color black, aluminium with stainless steel covers (IP20)	
DIMENSIONS	L x W x D = 440 x 65 x 105 mm (1.5 U) (excl. strain relief, mounting & cable bending radius)	
MOUNT	sidecover 19 inch double deep housing	
POWER INPUT	single phase 16 A, 230VAC - 50Hz	
CABLE ENTRY	power entry rear-side left	
CABLE & PLUG	Power lead (3G2,5 halogenfree) with CEE plug 3,0m (strain relief height 2,5cm)	
INPUT METERING	voltage (V), current (A), active power (W), apparent power (VA), reactive power (VAR), energy (kWh), apparent energy (VAh), frequency (Hz), power factor, crest factor, total harmonic distortion (%)	
OUTLETS	12 x IEC Lock 60320 – CX (C13/C15/C19/C21) and 6 x IEC Lock C13/C15 (IEC Lock)	
SWITCHED OUTLETS	12 times bistable near zero crossing switching relays	
FUSES	n/a	
CONFIGURABLE	Each PDU can be configured to your exact specifications—at no additional cost—including outlet configuration, fuse type, cable inlet position, cable length, plug type, protective features, RCS integration, and housing colour	

1 Phase 16 ampere 3.6 kVA

Tender text bld submittal: GM 1FE2DIS1101 Switched 1-phase 16A horizontal PDU (3.6 kVA) with 6 x IEC Lock CX (C13/C15/C19/C21) and 6 x IEC Lock C13/C15 outlets. Input metering and outlet-level switching (12x). Gateway Module with dual Gigabit LAN, USB, NFC remote display, and LED ring. Protocols: HTTP/HTTPS, REST API, MODBUS/TCP, SNMP v1/v2c/v3, Traps, IPv4/6, SMTP, Syslog, CLI. Data export: MS SQL, MySQL, MariaDB. Aluminium housing (IP20), 3.0m halogen-free CEE 16A power lead, 60°C rated. Cascading 100 PDUs per IP. Cascading 32 Sensors per PDU. Complimentary EnerTree DCEM software.

3 Phase 32 ampere 22 kVA

GM D750VMS3366

SWITCHED PDU 5.0 GATEWAY

SPECIFICATIONS

GENERAL	Remote display using smartphone NFC app, up to 100 PDUs share one IP address, ESD safe, toolless hot swappable communications module	
CONNECTIVITY	Gateway Module: dual 1Gbps Ethernet (RJ45/USB), RJ45 daisy chain, USB expansion/sensor • TLS encrypted communication to complimentary Enertree PDU monitoring & management software	
ENCLOSURE	Profile color black, aluminium with stainless steel covers (IP20)	
DIMENSIONS	L x W x D = 1805 x 65 x 52.5 mm (0U) (excl. strain relief, mounting & cable bending radius)	
MOUNT	Toolless mount buttons (brackets not included) (distance=1333, positions=235.8, 1569.2mm)	
POWER INPUT	three phase 32 A, 230/400V - 50Hz	
CABLE ENTRY	power entry side-cover top	
CABLE & PLUG	Power lead (5G6 halogenfree) with CEE plug 3,0m (strain relief height 2,5cm)	
BRANCH METERING	6 times voltage (V), current (A), active power (W), apparent power (VA), reactive power (VAR), energy (kWh), apparent energy (VAh), frequency (Hz), power factor, crest factor, total harmonic distortion (%)	
OUTLETS	18 x IEC Lock 60320 – CX (C13/C15/C19/C21) and 12 x IEC Lock C13/C15	
SWITCHED OUTLETS	30 times bistable near zero crossing switching relays	
FUSES	6 x Hydraulic-magnetic breaker 16A	
CONFIGURABLE	Each PDU can be configured to your exact specifications—at no additional cost—including outlet configuration, fuse type, cable inlet position, cable length, plug type, protective features, RCS integration, and housing colour	

39. Summary:

- vertical PDU (0 U)
- three phase 32 A
- metered inputs
- metered branches (6x)
- switched outlets
- 30 outlets

Tender text bld submittal: GM D750VMS3366 Switched 3-phase 32A vertical PDU (22 kVA) with 18 x IEC Lock CX (C13/C15/C19/C21) and 12 x IEC Lock C13/C15 outlets. Input and branch (6x) metering with outlet-level switching (30x). Gateway Module with dual Gigabit LAN, USB, NFC remote display, and LED ring. Protocols: HTTP/HTTPS, REST API, MODBUS/TCP, SNMP v1/v2c/v3, Traps, IPv4/6, SMTP, Syslog, CLI. Data export: MS SQL, MySQL, MariaDB. Aluminium housing (IP20), 3.0m halogen-free CEE 32A power lead. 6x hydraulic-magnetic breakers. 60°C rated. Cascading 100 PDUs per IP. Cascading 32 Sensors per PDU. Complimentary EnerTree DCEM software.

3 Phase 63 ampere 43.6 kVA

OUTLET METERED; OUTLET SWITCHABLE

Outlet Metered & Outlet Switchable PDUs with Flexible Communication Options

Schleifenbauer's **Managed PDUs** combine the functionality of switched and metered outlet PDUs, delivering advanced power management with remote control and real-time monitoring at the outlet level. Authorised users can securely power-cycle individual outlets, configure sequencing delays to minimise inrush currents, and access detailed consumption data locally or over the network.

Key Benefits of Managed PDUs with Switched & Metered Outlets

- **Remote power management:** Monitor and control outlets in real time without on-site access, increasing operational efficiency and service responsiveness.
- **Optimised energy usage:** Gain granular insight into outlet-level consumption to identify inefficiencies and reduce unnecessary energy usage.
- **Billing and cost allocation:** Enables accurate power usage tracking for individual departments, colocation clients or business units, supporting internal billing based on actual consumption. Billing-grade accuracy (+/- 0.5%)
- **Enhanced flexibility:** Support fast changes in load distribution, device provisioning and rack configurations in dynamic environments.
- **Advanced security:** Role-based access control, user authentication and logging help safeguard critical infrastructure against unauthorised actions.
- **Bi-stable relays:** Minimise energy consumption by using relays that require power only during switching, not to maintain the current state—resulting in lower internal heat and increased efficiency.
- **Near Zero Voltage Switching (N-ZVS):** Switching occurs at the lowest point of the AC waveform, reducing electrical stress and prolonging the lifespan of connected devices.
- **Outlet switching delay:** Configurable delay per outlet or group prevents inrush current, evenly distributes the load and ensures stable power-up behaviour.

Flexible Module Options to Match Your Infrastructure

This catalogue lists all PDU configurations with a **Gateway Module** as standard. However, each configuration is also available with a **Controller Module** or a **Daisy Chain Module**, depending on your infrastructure and monitoring needs. Please specify your preferred module when requesting a quote.

49. Summary:

- vertical PDU (0 U)
- three phase 16 A
- metered input
- metered outlets
- switched outlets
- 24 outlets

SPECIFICATIONS

GENERAL	Remote display using smartphone NFC app, up to 100 PDUs share one IP address, ESD safe, toolless hot swappable communications module	
CONNECTIVITY	Gateway Module: dual 1Gbps Ethernet (RJ45/USB), RJ45 daisy chain, USB expansion/sensor • TLS encrypted communication to complimentary Enertree PDU monitoring & management software	
ENCLOSURE	Profile color black, aluminium with stainless steel covers (IP20)	
DIMENSIONS	L x W x D = 1330 x 65 x 52.5 mm (0U) (excl. strain relief, mounting & cable bending radius)	
MOUNT	Toolless mount buttons (brackets not included) (distance=800, positions=265.0, 1065.0mm)	
POWER INPUT	three phase 16 A, 230/400V - 50Hz	
CABLE ENTRY	power entry side-cover top	
CABLE & PLUG	Power lead (5G2,5 halogenfree) with CEE plug 3,0m (strain relief height 2,5cm)	
INPUT METERING	voltage (V), current (A), active power (W), apparent power (VA), reactive power (VAR), energy (kWh), apparent energy (VAh), frequency (Hz), power factor, crest factor, total harmonic distortion (%)	
OUTLETS	12 x IEC Lock 60320 – CX (C13/C15/C19/C21) and 12 x IEC Lock C13/C15	
METERED OUTLETS	24 times voltage (V), current (A), active power (W), apparent power (VA), reactive power (VAR), energy (kWh), apparent energy (VAh), power factor, crest factor, total harmonic distortion (%)	
SWITCHED OUTLETS	24 times bistable near zero crossing switching relays	
FUSES	n/a	
CONFIGURABLE	Each PDU can be configured to your exact specifications—at no additional cost—including outlet configuration, fuse type, cable inlet position, cable length, plug type, protective features, RCS integration, and housing colour	

3 Phase 16 ampere 11 kVA

Tender text bid submittal: GM 82E1VIB3101 Managed 3-phase 16A vertical PDU (11 kVA) with 12 x IEC Lock CX outlets (C13/C15/C19/C21) and 12 x IEC Lock C13/C15 outlets. Input and outlet (24x) metering with outlet-level switching. Gateway Module with dual Gigabit LAN, USB, NFC remote display, and LED ring. Protocols: HTTP/HTTPS, REST API, MODBUS/TCP, SNMP v1/v2c/v3, Traps, IPv4/6, SMTP, Syslog, CLI. Data export: MS SQL, MySQL, MariaDB. Aluminium housing (IP20), 3.0m halogen-free CEE 16A power lead, 60°C rated. Cascading 100 PDUs per IP. Cascading 32 Sensors per PDU. Complimentary EnerTree DCEM software.

MANAGED PDU 5.0 GATEWAY

50. Summary:

- double horizontal PDU
- three phase 32 A
- metered input
- metered outlets
- switched outlets
- 6 outlets

SPECIFICATIONS

GENERAL

Remote display using smartphone NFC app, up to 100 PDUs share one IP address, ESD safe, toolless hot swappable communications module

CONNECTIVITY

Gateway Module: dual 1Gbps Ethernet (RJ45/USB), RJ45 daisy chain, USB expansion/sensor • TLS encrypted communication to complimentary Enertree PDU monitoring & management software

ENCLOSURE

Profile color black, aluminium with stainless steel covers (IP20)

DIMENSIONS

L x W x D = 440 x 65 x 105 mm (1.5 U)
(excl. strain relief, mounting & cable bending radius)

MOUNT

sidecover 19 inch double deep housing

POWER INPUT

three phase 32 A, 230/400V - 50Hz

CABLE ENTRY

power entry rear-side left

CABLE & PLUG

Power lead (5G6 halogenfree) with CEE plug 3,0m (strain relief height 2,5cm)

INPUT METERING

voltage (V), current (A), active power (W), apparent power (VA), reactive power (VAR), energy (kWh), apparent energy (VAh), frequency (Hz), power factor, crest factor, total harmonic distortion (%)

OUTLETS

6 x IEC Lock 60320 – CX (C13/C15/C19/C21)

METERED OUTLETS

6 times voltage (V), current (A), active power (W), apparent power (VA), reactive power (VAR), energy (kWh), apparent energy (VAh), power factor, crest factor, total harmonic distortion (%)

SWITCHED OUTLETS

6 times bistable near zero crossing switching relays

FUSES

6 x Hydraulic-magnetic breaker 16A

CONFIGURABLE

Each PDU can be configured to your exact specifications—at no additional cost—including outlet configuration, fuse type, cable inlet position, cable length, plug type, protective features, RCS integration, and housing colour

3 Phase 32 ampere 22 kVA

Tender text bld submittal: GM A125DIB3361 Managed 3-phase 32A horizontal PDU (22 kVA) with 6 x IEC Lock outlets (C13/C15/C19/C21). Input and outlet (6x) metering with outlet-level switching. Gateway Module with dual Gigabit LAN, USB, NFC remote display, and LED ring. Protocols: HTTP/HTTPS, REST API, MODBUS/TCP, SNMP v1/v2c/v3, Traps, IPv4/6, SMTP, Syslog, CLI. Data export: MS SQL, MySQL, MariaDB. Aluminium housing (IP20), 3.0m halogen-free CEE 32A power lead. 6x hydraulic-magnetic breakers. 60°C rated. Cascading 100 PDUs per IP. Cascading 32 Sensors per PDU. Complimentary EnerTree DCEM software.

INLINE ENERGY METER

Inline Meters with Flexible Communication Options

Upgrade your existing non-intelligent power distribution without replacing your current PDUs. Schleifenbauer's Inline Meters offer an intelligent, cost-efficient solution for metering energy usage across both single-phase (16A / 32A) and three-phase (16A / 32A) environments.

Designed for seamless integration in vertical and horizontal setup. The horizontal Inline Meter fits a half-width 19-inch form factor, allowing two units to be mounted side by side in a standard rack. Installed between the power feed and connected equipment, the meter continuously measures current and voltage to calculate real-time power consumption. Data is displayed locally via the built-in screen and transmitted to your monitoring system via your preferred communication protocol.

When direct PDU monitoring isn't possible

In some colocation or multi-tenant data centre environments, metering via intelligent PDUs within client-owned racks may not be allowed for purposes such as billing, monitoring or security. Clients often retain full control over their racks, restricting direct access to infrastructure and energy data.

To overcome this limitation, a Schleifenbauer Inline Meter can be installed externally—between the power source and the client's PDU. This allows the data centre to monitor energy consumption independently of the client's infrastructure, enabling:

- Accurate billing based on actual usage
- Independent monitoring without accessing client equipment
- Enhanced security by restricting data access to the defined metering point

Key Benefits for Data Centres

- **Cost-efficient and sustainable:** Upgrade existing infrastructure without replacing PDUs—reducing both capital expenditure and electronic waste.
- **Smart metering for legacy PDUs:** Add metering capabilities to non-intelligent PDUs without a full infrastructure overhaul.
- **Real-time energy insights:** Accurate measurement ($\pm 0.5\%$) supports capacity planning, billing and operational efficiency.
- **Efficiency improvement:** Identify underused or inefficient equipment and improve PUE through informed energy management.
- **Modular, scalable design:** Implement targeted upgrades across your environment—adaptable to both small installations and large-scale deployments.

Communication Modules to Match Your Requirements

Each Inline Meter in this catalogue includes a Gateway Module as standard. Alternatively, models can be supplied with a Controller Module or Daisy Chain Module, depending on your system architecture and integration needs. Please specify your preferred module when requesting a quotation.

Model INLINE METER

GM 47A7VIP1101

INLINE METER 5.0 GATEWAY

SPECIFICATIONS

GENERAL

Remote display using smartphone NFC app, up to 100 PDUs share one IP address, ESD safe, toolless hot swappable communications module

CONNECTIVITY

Gateway Module: dual 1Gbps Ethernet (RJ45/USB), RJ45 daisy chain, USB expansion/sensor • TLS encrypted communication to complimentary Enertree PDU monitoring & management software

ENCLOSURE

Profile color black, aluminium with stainless steel covers (IP20)

DIMENSIONS

L x W x D = 280 x 65 x 52.5 mm (0U)
(excl. strain relief, mounting & cable bending radius)

MOUNT

sidecover table mount

POWER INPUT

single phase 16 A, 230VAC - 50Hz

CABLE ENTRY

power entry side-cover top

CABLE & PLUG

Power lead (3G2,5 halogenfree) with CEE plug 2,0m (strain relief height 2,5cm)

INPUT METERING

voltage (V), current (A), active power (W), apparent power (VA), reactive power (VAR), energy (kWh), apparent energy (VAh), frequency (Hz), power factor, crest factor, total harmonic distortion (%)

OUTLETS

1 x Exit lead (3G2,5 halogenfree) with IEC60309 socket 0,5m

1 Phase 16 ampere 3.6 kVA

Tender text bld submittal: GM 47A7VIP1101 Inline meter 1-phase 16A vertical (3.6 kVA) with 1 x IEC60309 socket (exit lead 0.5 m). Input metering. Gateway Module with dual Gigabit LAN, USB, NFC remote display, and LED ring. Protocols: HTTP/HTTPS, REST API, MODBUS/TCP, SNMP v1/v2c/v3, Traps, IPv4/6, SMTP, Syslog, CLI. Data export: MS SQL, MySQL, MariaDB. Aluminium housing (IP20), 2.0m CEE 16A plug, 60°C rated. Cascading 100 Inline Meters per IP. Cascading 32 Sensors per Inline Meter. Complimentary EnerTree DCEM software.

CABLE & PLUG

Power lead (5G2,5 halogenfree) with CEE plug 2,0m (strain relief height 2,5cm)

INPUT METERING

voltage (V), current (A), active power (W), apparent power (VA), reactive power (VAR), energy (kWh), apparent energy (VAh), frequency (Hz), power factor, crest factor, total harmonic distortion (%)

OUTLETS

1 x Exit lead (5G2,5 halogenfree) with IEC60309 socket 0,5m

3 Phase 16 ampere 11 kVA

Tender text bid submittal: GM 373AVIP3101 inline meter 3-phase 16A vertical (11 kVA) with 1 x IEC60309 socket (exit lead 0.5 m). Input metering. Gateway Module with dual Gigabit LAN, USB, NFC remote display, and LED ring. Protocols: HTTP/HTTPS, REST API, MODBUS/TCP, SNMP v1/v2c/v3, Traps, IPv4/6, SMTP, Syslog, CLI. Data export: MS SQL, MySQL, MariaDB. Aluminium housing (IP20), 2.0m halogen-free CEE 16A power lead. 60°C rated. Cascading 100 Inline Meters per IP. Cascading 32 Sensors per Inline Meter. Complimentary EnerTree DCEM software.

GM BA4EDIP3101

INLINE METER 5.0 GATEWAY

SPECIFICATIONS

GENERAL	Remote display using smartphone NFC app, up to 100 PDUs share one IP address, ESD safe, toolless hot swappable communications module	
CONNECTIVITY	Gateway Module: dual 1Gbps Ethernet (RJ45/USB), RJ45 daisy chain, USB expansion/sensor • TLS encrypted communication to complimentary Enertree PDU monitoring & management software	
ENCLOSURE	Profile color black, aluminium with stainless steel covers (IP20)	
DIMENSIONS	L x W x D = 209 x 65 x 105 mm (1.5 U) (excl. strain relief, mounting & cable bending radius)	
MOUNT	sidecover 19 inch double deep housing	
POWER INPUT	three phase 16 A, 230/400V - 50Hz	
CABLE ENTRY	power entry rear-side left	
CABLE & PLUG	Power lead (5G2,5 halogenfree) with CEE plug 2,0m (strain relief height 2,5cm)	
INPUT METERING	voltage (V), current (A), active power (W), apparent power (VA), reactive power (VAR), energy (kWh), apparent energy (VAh), frequency (Hz), power factor, crest factor, total harmonic distortion (%)	
OUTLETS	1 x Exit lead (5G2,5 halogenfree) with IEC60309 socket 0,5m	

3 Phase 16 ampere 11 kVA

Tender text bid submittal: GM BA4EDIP3101 inline meter 3-phase 16A horizontal (11 kVA) with 1 x IEC60309 socket (exit lead 0.5 m). Input metering. Gateway Module with dual Gigabit LAN, USB, NFC remote display, and LED ring. Protocols: HTTP/HTTPS, REST API, MODBUS/TCP, SNMP v1/v2c/v3, Traps, IPv4/6, SMTP, Syslog, CLI. Data export: MS SQL, MySQL, MariaDB. Aluminium housing (IP20), 2.0m halogen-free CEE 16A power lead. 60°C rated. Cascading 100 Inline Meters per IP. Cascading 32 Sensors per Inline Meter. Complimentary EnerTree DCEM software.

NON-INTELLIGENT

Basic PDUs – Reliable Power Distribution without Intelligence

Schleifenbauer's **Basic PDUs** provide dependable power distribution for environments where monitoring, remote control, or integration is not required. These non-intelligent units deliver reliable performance with minimal complexity—making them a practical solution for specific applications within data centre infrastructure.

Key Benefits of Basic PDUs

- **Cost-effective:** A budget-friendly alternative, ideal for smaller-scale installations or cost-sensitive projects.
- **Simple deployment:** No configuration, software, or network setup required—enabling rapid installation and immediate operation.
- **High reliability:** With no active electronics or network interfaces, Basic PDUs reduce potential points of failure and are inherently robust.
- **Universal compatibility:** Fully compatible with all IT equipment, as they operate independently of communication protocols and management platforms.

Application Considerations

Basic PDUs are well suited for environments where power distribution alone is sufficient. However, they do not offer real-time monitoring, remote switching, or data analytics—features that are essential for capacity planning, energy efficiency, and operational insight in more complex data centre environments.

For enhanced control and visibility, Schleifenbauer recommends intelligent PDUs or modular alternatives such as **Inline Meters**, which add metering functionality to existing infrastructure without full replacement.

Model *BASIC PDU*

5FFBHNN1101

BASIC PDU

SPECIFICATIONS

ENCLOSURE	Profile color black, aluminium with stainless steel covers (IP20)
DIMENSIONS	L x W x D = 440 x 65 x 52.5 mm (1.5 U) (excl. strain relief, mounting & cable bending radius)
MOUNT	sidecover 19 inch
POWER INPUT	single phase 16 A, 230VAC - 50Hz
CABLE ENTRY	power entry rear-side left
CABLE & PLUG	Power lead (3G2,5 halogenfree) with CEE plug 3,0m (strain relief height 2,5cm)
OUTLETS	7 x IEC Lock 60320 – CX (C13/C15/C19/C21) and 7 x IEC Lock C13/C15
FUSES	n/a
CONFIGURABLE	Each PDU can be configured to your exact specifications—at no additional cost—including outlet configuration, fuse type, cable inlet position, cable length, plug type, protective features and housing colour

1 Phase 16 ampere 3.6 kVA

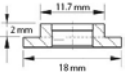

Tender text bid submittal: 5FFBHNN1101 Basic 1-phase 16A horizontal PDU (3.6 kVA) with 14 x IEC Lock outlets (C13/C15/C19/C21). Aluminium housing (IP20), 3.0m halogen-free CEE 16A power lead. Sidecover 19" mounting, 60°C rated.

SENSORS

Temperature Sensor

- 2x RJ45 connector
- 1x USB-C (with single screw lock)
- Dual color status Led

Temperature & Humidity Sensor

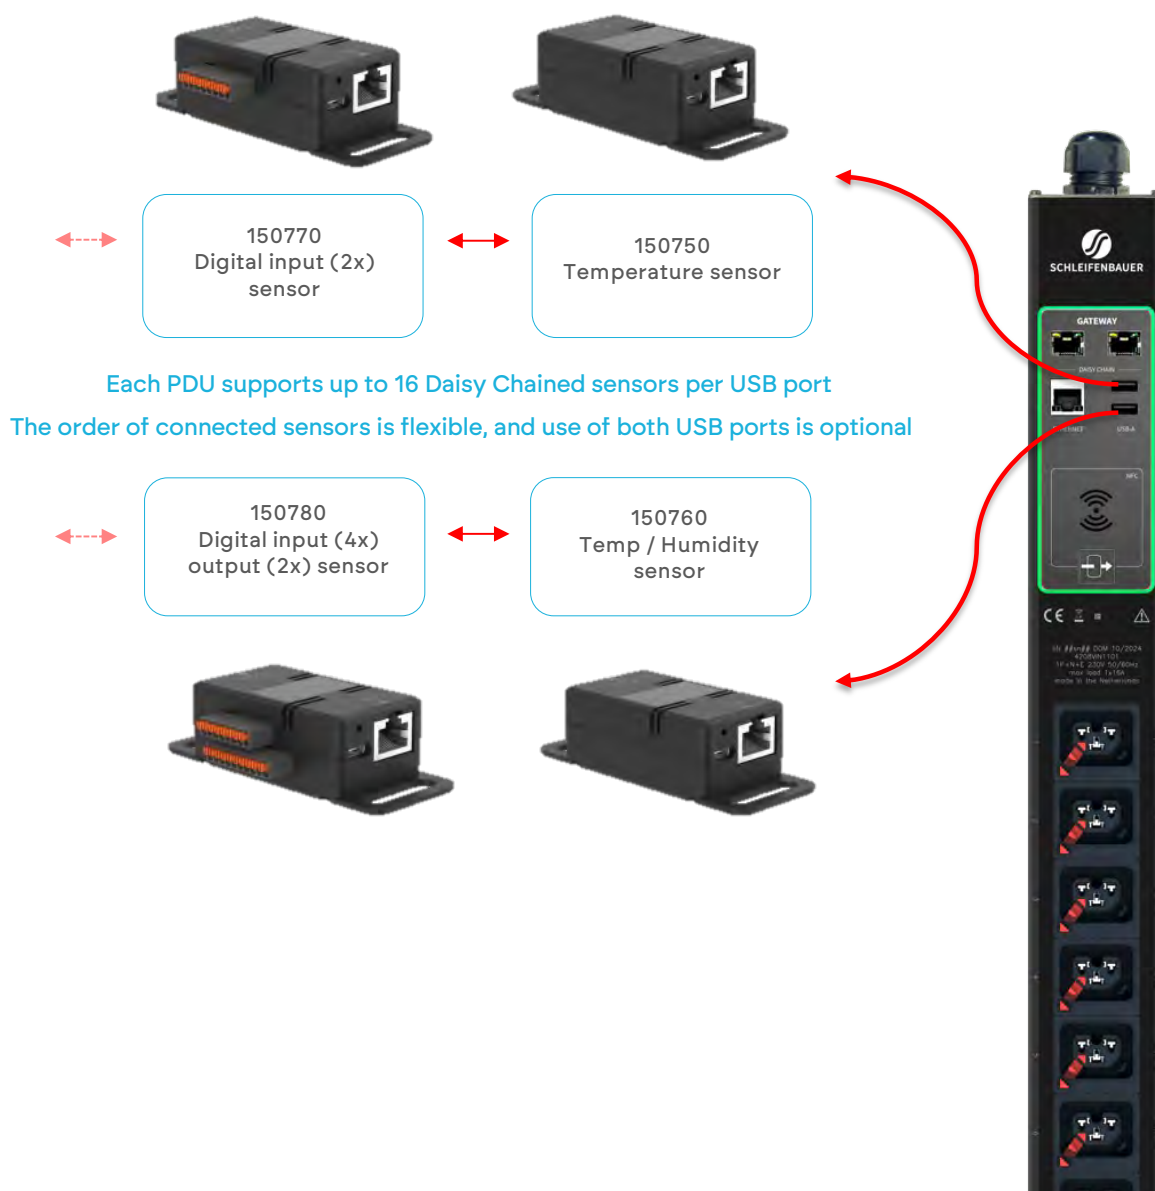

- 2x RJ45 connector
- 1x USB-C (with single screw lock)
- Dual color status Led

Digital input (2 x) sensor

- 2x RJ45 connector
- 1x USB-C (with single screw lock)
- 2x digital input (connector 4 pins)
- Non-isolating (contact closure), Ground switching (Internal Pull-Up)
- Dual color status Led

Digital input (4x) output (2x) sensor

- 2x RJ45 connector
- 1x USB-C (with single screw lock)
- 4x digital input (connector 8 pins)
- Non-isolating (contact closure), Ground switching (Internal Pull-Up)
- 2x relay 12V Power In, 2 dry contacts outputs
- Dual color status Led

Fully Configurable PDUs – At No Extra Cost or Delay

Every Schleifenbauer PDU is assembled to order and fully tailored to your specifications. You define exactly what you need—at no additional cost, with no minimum order quantity, and without affecting lead times.

Whether you require:

- Specific cable lengths or connector types
- Custom outlet layouts (type, number, position, and colour)
- Integrated measurement and monitoring features
- Controller positioning or control interface adjustments
- Unique identification (labelling, barcodes, colour coding)
- Mechanical adaptations for specific rack or mounting situations

We ensure your PDU fits seamlessly into your infrastructure and operational workflow. Our efficient production process guarantees fast delivery regardless of the configuration.

With Schleifenbauer, there is no need to compromise on design or planning. You get precisely what your project requires—quickly, reliably, and without hidden costs.

Find all the detailed customisation options on our website www.Schleifenbauer.eu

Measurement
Per Phase
Per Breaker
Per Outlet

Remote Switching
Outlet switching delay
Near Zero Voltage Switching
Bi-stable relays

Modules
Gateway Module
Controller module
Daisy chain Module

Protection
Dehn Surge protection
External Earthing

Chassis colours
Red

Mounting
Type of brackets
Custom made brackets

Circuit Breaker
Hydraulic Magnetic
MCB
Thermal fuse
Melt fuse

Outlets
Type & Amount
Alternating phase outlets

Schleifenbauer - Where Possibility Takes Shape

A power distribution unit is more than a technical component — it's the silent backbone of your infrastructure. At Schleifenbauer, we believe it should reflect the way *you* think, work and build. What you see here is not a product range — it's a canvas of possibilities.

Every line, every outlet, every angle is the result of a choice. **Your choice.**
Because true reliability isn't just built — it's designed, together.

This is the freedom to create
This is power, redefined
This is Schleifenbauer

Submit a tender text or use this form to specify your PDU request and send it to sales@schleifenbauer.eu

Infra	PDU orientation	<input type="checkbox"/> Vertical 0U <input type="checkbox"/> Horizontal 19" <input type="checkbox"/> Horizontal 21"
	Phase	<input type="checkbox"/> Single-phase 1P <input type="checkbox"/> Three-Phase 3P
	Current rating	<input type="checkbox"/> 10A <input type="checkbox"/> 16A <input type="checkbox"/> 32A <input type="checkbox"/> 63A
Intelligence	Basic PDU non-metered	<input type="checkbox"/> Yes <input type="checkbox"/> No
	Input energy metering	<input type="checkbox"/> Yes <input type="checkbox"/> No
	Branch-level energy metering	<input type="checkbox"/> Yes <input type="checkbox"/> No
	Outlet-level energy metering	<input type="checkbox"/> Yes <input type="checkbox"/> No
	Remote outlet switching	<input type="checkbox"/> Yes <input type="checkbox"/> No
Communication Module	Gateway Module Choose this module for advanced energy management with the included EnerTree Platform DCEM software. EnerTree offers comprehensive monitoring, risk management, historical analysis, and seamless DCIM integration. By externalising PDU intelligence, it maximises computing power, scalability, and software-driven capacity—eliminating the need for costly internal PDU hardware. Supports up to 10,000 PDUs in system. Measurement refresh rate: once a second.	<input type="checkbox"/> Yes <input type="checkbox"/> No  
	Controller Module Choose this module for a standalone PDU solution with a built-in web interface, offering a familiar and conventional approach to PDU management. Ideal for data centres that prefer independent PDU control without relying on an external software platform. The EnerTree Lite embedded software provides a direct, user-friendly interface within the module itself, fully compatible with any existing DCIM software. Supports up to 100 PDUs in system. Measurement refresh rate: once per 5 seconds.	<input type="checkbox"/> Yes <input type="checkbox"/> No  
	Daisy Chain Module Choose this module to securely and efficiently connect multiple PDUs without an Ethernet port, providing hardware-level security. As a Data Relay module, it enables centralised management of up to 100 PDUs using a single IP address. Ideal for large-scale installations with a ring topology, where one PDU with a Gateway or Controller module handles network communication, while up to 99 PDUs with Daisy Chain modules collect and transmit PDU measurement data.	<input type="checkbox"/> Yes <input type="checkbox"/> No
