## Product Updates

### Now Available ACC 7

[Avigilon Control Center \(ACC\) 7](#) video management software is designed to revolutionise how users interact with and gain situational awareness from their video security systems. It introduces Focus of Attention, a cutting-edge user interface for live video monitoring that uses Avigilon's self-learning video analytics and Unusual Motion Detection technologies to determine what information is important and should be presented to security operators.

### Features and Benefits

- ACC 7 delivers a new focus of attention UI, helping ensure critical events do not go unnoticed
- Is designed to revolutionise how users interact with and gain situational awareness from their video surveillance systems
- It offers a new perspective on video monitoring to make larger systems more efficient, even with a limited number of operators
- New modern UI options adapt to various working conditions and help ensure improved clarity in the presentation of information, such as a new dark theme optimised for low-light monitoring environments
- A simpler approach to licensing that simplifies ordering and offers more self-service options in a brand new customer and partner portal
- ONVIF® Profile T compliant for improved support of third-party cameras and devices

### Now Available: Third Generation HD Video Appliance

Avigilon's latest [HD Video Appliance](#) is designed to meet the highest quality standards and streamline the deployment and maintenance of security systems, with simplified network setup and switch configuration when connecting to ACC. It combines an ACC server, a managed network switch, storage server and an ACC Client workstation, all to reduce the cost and complexity of installations.
