Biometrics at a Glance

Our Environ Locking Solution is Data Centre centric. It is ideal for:
- **Cloud Data Centres**
- **Co-Location or Shared Facilities**
- **Managed Services**

Environ Locking Solutions from Excel, in conjunction with Southco and BioConnect, provide an ergonomic and stylish solution to environments where security is paramount.

The Solution brings intelligence and monitoring right down to the lock level of a data rack, giving you ultimate control of access to the services and equipment within a rack making it ideal for sites where access is restricted for authorised personnel only.
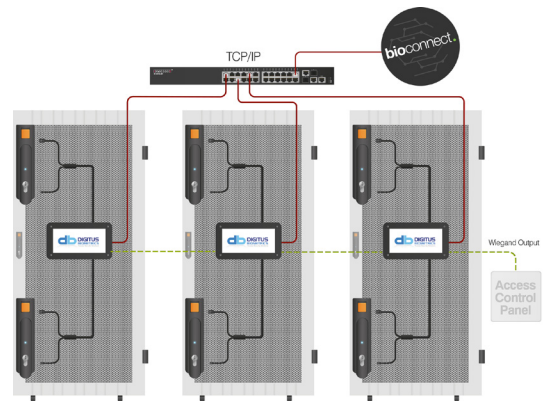

IS YOUR DATA
SECURE?

Key Benefits

- Users don't need to remember a password or carry an enabler (ID Card)
- Biometric systems are more difficult to hack
- An individual's biometric traits cannot be stolen
- The person to be identified must be physically present for identification entry

Each unit can support two locks, so both front & rear doors to a cabinet can be placed on a Sentry unit. Using PoE makes this an easy and cost effective application, which allows for integration into existing access control panels.

Biometric Access Control gives you 100% physical security at every potential point of vulnerability

55 percent of breaches occur as a result of unauthorized access by 'malicious insiders' and 'inadvertent actors'
