

## Mayflex Packaging Initiatives

Mayflex has made some fundamental changes to the way goods are wrapped and secured for delivery. Our mission is to lead the way in our industry to remove as much 'single use plastic' from the supply chain as possible.

Comparing 2018 to 2019 figures, Mayflex will be removing 11,978 Kg of plastic packaging from its operation.

## Changes Implemented

### Packaging

Plastic bubble wrap has been replaced by recycled corrugated paper tubing. By switching to this alternative Mayflex will remove 400 rolls of bubble wrap from its operation in 2020.

Standard tape has been replaced by a paper version. By switching to a paper tape, Mayflex will remove 9,348 rolls of plastic tape during 2020.

## Excel - Leading the Way #PlasticFree

At Excel, we #SayNoToSingleUsePlastic

## Specialist Support Services

The Specialist Support Services team now use brown paper bags to despatch GOP boxes and to protect cassettes situated at the end of all pre-terminated copper looms, opposed to plastic bubble bags.

Our services are ideal for projects with limited time onsite or for rapid deployment projects. They include:

- Pre-terminated **copper** and **fibre** assemblies
- Pre-staging of **IP devices**
- Laser **engraved labels**
- Configured cabinets**
- Camera and bracket **spraying**

## Cable Winding Service

Our free of charge cable winding service, which allows you to order a length of cable cut to an exact length for next day delivery, is now utilising corrugated cardboard covering opposed to plastic wrapping.
