

Future-Proof Your UPS Management

Uniti Power IoT Software: Embrace the Future

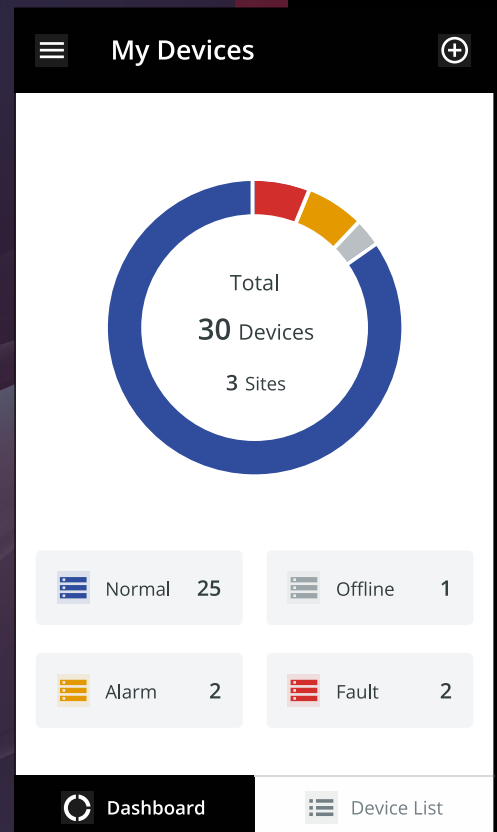

Available for both iOS and Android, Uniti Power IoT is more than just a software solution—it's your gateway to the future of UPS management. By harnessing the power of IoT, one of the most transformative technologies of our time, it offers advanced features that put you ahead of the curve.

- ✓ **Real-time Monitoring:** Stay informed and proactive with real-time monitoring of your UPS systems. Instantly detect and respond to any issues or anomalies.
- ✓ **Predictive Maintenance:** Our advanced analytics predict potential problems before they occur, saving time and reducing maintenance costs.
- ✓ **Remote Control:** Control your UPS systems from anywhere, at any time. With Uniti Power IoT, you're always in control.
- ✓ **Scalability:** Whether you're monitoring one UPS system or a hundred, Uniti Power IoT scales with your needs, making it a future-proof solution.
- ✓ **Free to Use:** Experience all these advanced features at no cost. Uniti Power IoT is free, providing exceptional value.

Ideal Applications: Uniti Power IoT is perfect for businesses with multiple UPS systems spread across different locations, businesses that require remote monitoring and control, and those that want to leverage predictive maintenance to minimise downtime.
