Tether's ANPR improves:

Improves Security

Efficiency

Service Levels

License plate recognition (ANPR) has traditionally been costly and only relevant for a limited number of applications.

Innovation with IP cameras allows for wider use of automatic ANPR solutions for a fraction of costs associated with traditional systems.

Tether's ANPR solutions are compatible with the most widely used ANPR such as Hikvision and Dahua. You simply need a Tetherbox on site. The Tetherbox connects to the ANPR camera (along with your other cameras) and makes it easy to collect and manage license plate information.

Best of all, the Tetherbox receives over the air updates with newly added features and camera compatibilities.
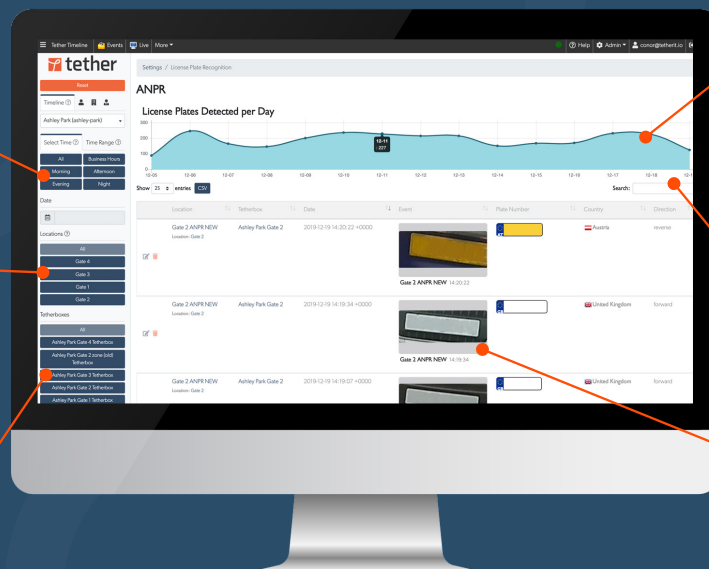

Applications include:

- Police & security
- Parking management
- Toll roads
- Traffic management
- Access control
- Vehicle alerts
